TABLE OF CONTENTS

Volume 4 – Victorian terrestrial environment

Chapter 1 Introduction

1.1	Victorian project overview	1-1
1.2	Stakeholder engagement	1-4
1.2.1	Engagement activities	1-4
1.2.2	Project changes in response to feedback	1-9
1.2.3	Engagement outcomes and responses	1-9
1.3	Structure of the EIS/EES	1-24

Chapter 2 Geomorphology and geology

2.1	Method	2-2
2.1.1	Study area	2-2
2.1.2	Assumptions and limitations	2-2
2.2	Existing conditions	2-3
2.2.1	Vegetation cover	2-3
2.2.2	Geology and regolith	2-3
2.2.3	Geomorphology and geomorphic processes	2-7
2.2.4	Seismicity	2-7
2.2.5	Climate	2-7
2.2.6	Geomorphic attributes	2-11
2.2.7	Trench sectors	2-11
2.3	Construction impacts	2-17
2.4	Operation impacts	2-18
2.5	Decommissioning impacts	2-18
2.6	Environmental performance requirements	2-19
2.7	Residual impacts	2-22
2.8	Conclusion	2-33

Chapter 3 Contaminated land and acid sulfate soils

3.1	Method.....	3-2
3.1.1	Study area	3-4
3.1.2	Legislative context.....	3-4
3.1.3	Assumptions and limitations.....	3-5
3.2	Existing conditions.....	3-6
3.2.1	Potential contamination.....	3-6
3.2.2	Summary of environmental values.....	3-12
3.2.3	Sensitive receptors and exposure pathways	3-13
3.3	Construction impacts.....	3-14
3.3.1	Localised impacts of existing waste.....	3-15
3.3.2	Excavated soil and surplus material	3-15
3.3.3	Unexpected contamination.....	3-16
3.3.4	Acid sulfate soils	3-16
3.3.5	General construction impacts.....	3-17
3.4	Operation impacts	3-17
3.5	Decommissioning impacts.....	3-17
3.6	Environmental performance requirements	3-18
3.7	Residual impacts	3-20
3.8	Cumulative impacts	3-22
3.9	Conclusion.....	3-22

Chapter 4 Groundwater

4.1	Method.....	4-2
4.1.1	Study area	4-2
4.1.2	Legislative context.....	4-4
4.1.3	Assumptions and limitations.....	4-4
4.2	Existing conditions.....	4-5
4.2.1	Land use.....	4-6
4.2.2	Geology.....	4-6

4.2.3	Hydrology	4-10
4.2.4	Hydrogeology	4-12
4.2.5	Groundwater management areas	4-14
4.2.6	Groundwater levels and flow directions	4-14
4.2.7	Groundwater and surface water interaction	4-18
4.2.8	Groundwater use.....	4-19
4.2.9	Groundwater dependent ecosystems	4-20
4.2.10	Groundwater quality	4-23
4.2.11	Groundwater contamination	4-23
4.2.12	Summary of groundwater values	4-24
4.3	Construction impacts	4-28
4.3.1	Groundwater bores	4-28
4.3.2	Temporary dewatering and GDEs	4-29
4.3.3	HDD.....	4-33
4.3.4	Construction of project infrastructure	4-34
4.3.5	Groundwater acidification.....	4-35
4.3.6	Saline intrusion.....	4-37
4.3.7	Contamination	4-37
4.3.8	Groundwater flows and recharge	4-38
4.4	Operation impacts	4-41
4.4.1	Contamination	4-41
4.5	Decommissioning impacts.....	4-41
4.6	Environmental performance requirements	4-42
4.7	Residual impacts	4-46
4.7.1	Construction	4-46
4.7.2	Operation.....	4-48
4.7.3	Decommissioning.....	4-49
4.7.4	Summary of residual impacts.....	4-49
4.8	Cumulative impacts	4-56
4.9	Conclusion.....	4-56

Chapter 5 Surface water

5.1	Method.....	5-2
5.1.1	Study area.....	5-3
5.1.2	Legislative context.....	5-5
5.1.3	Assumptions and limitations.....	5-6
5.2	Existing conditions.....	5-6
5.2.1	Waterways.....	5-6
5.2.2	Flooding.....	5-12
5.2.3	Water quality.....	5-12
5.2.4	Contamination.....	5-15
5.2.5	Geomorphology.....	5-16
5.2.6	Summary of values.....	5-20
5.3	Construction impacts.....	5-20
5.3.1	Flooding.....	5-21
5.3.2	Water quality.....	5-29
5.3.3	Geomorphology.....	5-30
5.4	Operation impacts.....	5-31
5.4.1	Waterways.....	5-31
5.4.2	Converter and transition stations.....	5-32
5.5	Decommissioning impacts.....	5-35
5.6	Environmental performance requirements.....	5-35
5.7	Residual impacts.....	5-39
5.7.1	Construction.....	5-39
5.7.2	Operation.....	5-40
5.8	Cumulative impacts.....	5-46
5.9	Conclusion.....	5-46

Chapter 6 Agriculture and forestry

6.1	Method.....	6-2
6.1.1	Study area.....	6-3

6.1.2	Legislative context.....	6-5
6.1.3	Assumptions and limitations.....	6-5
6.2	Existing conditions.....	6-5
6.2.1	Landholders	6-8
6.2.2	Agricultural and forestry values.....	6-8
6.2.3	Sensitivity of agricultural values.....	6-9
6.3	Construction impacts.....	6-11
6.3.1	Agriculture	6-11
6.3.2	Forestry	6-15
6.4	Operation impacts	6-16
6.4.1	Agriculture	6-17
6.4.2	Forestry	6-18
6.5	Decommissioning impacts.....	6-18
6.6	Environmental performance requirements	6-19
6.7	Residual impacts	6-23
6.7.1	Agricultural impacts.....	6-23
6.7.2	Forestry impacts.....	6-28
6.8	Cumulative impacts	6-31
6.9	Conclusion.....	6-32

Chapter 7 Landscape and visual

7.1	Method.....	7-2
7.1.1	Study area.....	7-4
7.1.2	Policies and guidelines.....	7-6
7.1.3	Assumptions and limitations.....	7-7
7.2	Existing conditions.....	7-7
7.2.1	Landscape character units.....	7-8
7.2.2	Regional landscape character.....	7-9
7.2.3	Summary of values	7-11
7.3	Construction impacts.....	7-12
7.3.1	Coasts and plains.....	7-17

7.3.2	Cleared flat farmland (South).....	7-18
7.3.3	Rolling farmland and forests	7-19
7.3.4	Cleared flat farmland (North).....	7-22
7.4	Operation impacts	7-23
7.5	Decommissioning impacts.....	7-24
7.6	Environmental performance requirements	7-24
7.7	Residual impacts	7-25
7.7.1	Construction	7-25
7.7.2	Operation.....	7-26
7.7.3	Residual impact summary.....	7-30
7.8	Cumulative impacts	7-34
7.9	Conclusion.....	7-35

Chapter 8 Traffic and transport

8.1	Method.....	8-2
8.1.1	Study area	8-3
8.1.2	Legislative context.....	8-5
8.1.3	Assumptions and limitations.....	8-5
8.2	Existing conditions.....	8-6
8.2.1	Road network	8-6
8.2.2	Road pavement.....	8-16
8.2.3	Bridges and culverts.....	8-17
8.2.4	Vehicle crashes	8-17
8.2.5	Public transport	8-21
8.2.6	Walking and cycling network.....	8-21
8.2.7	Summary of values	8-21
8.3	Construction impacts.....	8-22
8.3.1	Overview of construction-related traffic.....	8-23
8.3.2	Road network capacity.....	8-26
8.3.3	Safe road performance, condition and design	8-28
8.3.4	Public and active transport.....	8-34

8.3.5	Public transport services and infrastructure	8-35
8.4	Operation impacts	8-35
8.4.1	Converter station	8-35
8.4.2	Transition station	8-36
8.4.3	Land cables	8-36
8.5	Decommissioning impacts	8-36
8.6	Environmental performance requirements	8-36
8.7	Residual impacts	8-38
8.8	Cumulative impacts	8-41
8.9	Conclusion	8-41

Chapter 9 Air quality

9.1	Method	9-2
9.1.1	Study area	9-3
9.1.2	Legislative context	9-3
9.1.3	Assumptions and limitations	9-4
9.2	Existing conditions	9-5
9.2.1	Topography and landscape	9-5
9.2.2	Land use	9-5
9.2.3	Meteorology and climate	9-8
9.2.4	Ambient air quality	9-8
9.2.5	Sensitive receivers	9-9
9.3	Construction impacts	9-12
9.3.1	Land cable	9-12
9.3.2	Hazelwood converter station	9-20
9.4	Operation impacts	9-21
9.5	Decommissioning impacts	9-21
9.6	Environmental performance requirements	9-22
9.7	Residual risk of impact	9-23
9.8	Cumulative risk of impact	9-25
9.9	Conclusion	9-25

Chapter 10 Noise and vibration

10.1	Method.....	10-2
10.1.1	Reference levels	10-4
10.1.2	Study area	10-5
10.1.3	Legislative context.....	10-7
10.1.4	Assumptions and limitations.....	10-8
10.2	Existing conditions.....	10-9
10.2.1	Survey	10-9
10.2.2	Summary of values	10-16
10.3	Construction impacts.....	10-16
10.3.1	Noise emission data.....	10-17
10.3.2	Cable and converter station	10-18
10.3.3	Shore crossing	10-24
10.3.4	Local feature crossings	10-27
10.3.5	Offsite transportation noise	10-33
10.3.6	Construction vibration	10-33
10.4	Operation impacts	10-34
10.5	Decommissioning impacts.....	10-37
10.6	Environmental performance requirements	10-37
10.7	Residual impacts	10-42
10.8	Cumulative impacts	10-44
10.8.1	Construction	10-44
10.8.2	Operation.....	10-44
10.9	Conclusion.....	10-44

Chapter 11 Terrestrial ecology

11.1	Method.....	11-2
11.1.1	Study area	11-3
11.1.2	Landscape regions.....	11-3
11.1.3	Legislative context.....	11-5

11.1.4	Assumptions and limitations.....	11-6
11.2	Existing conditions.....	11-7
11.2.1	Native vegetation and habitat	11-7
11.2.2	Threatened ecological communities	11-11
11.2.3	Groundwater dependent ecosystems	11-11
11.2.4	Threatened species.....	11-19
11.2.5	Summary of terrestrial ecology values.....	11-34
11.3	Construction impacts.....	11-36
11.3.1	Native vegetation and habitat	11-37
11.3.2	Threatened ecological communities	11-39
11.3.3	Threatened species.....	11-40
11.3.4	Matters of national environmental significance	11-51
11.4	Operation impacts	11-116
11.5	Decommissioning impacts.....	11-116
11.6	Environmental performance requirements	11-117
11.7	Residual impacts	11-119
11.7.1	Native vegetation and habitat	11-119
11.7.2	Threatened ecological communities	11-120
11.7.3	Threatened species.....	11-120
11.7.4	Summary of residual impacts.....	11-123
11.8	Cumulative impacts	11-127
11.9	Offsets	11-127
11.10	Conclusion.....	11-128

Chapter 12 Bushfire

12.1	Method.....	12-2
12.2	Study area	12-2
12.3	Legislative context.....	12-3
12.4	Assumptions and limitations.....	12-5
12.5	Bushfire risk factors	12-5
12.5.1	Fire history.....	12-5

12.5.2	Fire weather and danger ratings	12-8
12.5.3	Climate	12-8
12.5.4	Topography	12-8
12.5.5	Land use and fuel hazard.....	12-11
12.5.6	Fire ignition sources	12-11
12.6	Values at risk	12-16
12.6.1	Life.....	12-16
12.6.2	Property assets	12-17
12.7	Impact assessment	12-18
12.7.1	Construction impacts.....	12-19
12.7.2	Operation impacts	12-21
12.7.3	Decommissioning impacts	12-22
12.8	Environmental performance requirements	12-23
12.9	Residual impacts	12-24
12.9.1	Construction	12-24
12.9.2	Operation.....	12-25
12.9.3	Decommissioning	12-25
12.10	Cumulative impacts	12-27
12.11	Conclusion.....	12-27
Chapter 13 Aboriginal cultural heritage		
13.1	Method.....	13-2
13.1.1	Study area	13-3
13.1.2	Legislative context.....	13-5
13.1.3	Assumptions and limitations.....	13-6
13.2	Existing conditions.....	13-7
13.2.1	Natural environment.....	13-7
13.2.2	Historical and ethno-historical accounts of Aboriginal occupation in the region.....	13-12
13.2.3	Registered Aboriginal cultural heritage	13-13
13.2.4	Aboriginal places predictive model	13-17
13.2.5	Fieldwork program	13-17

13.2.6	Aboriginal cultural values assessment.....	13-27
13.2.7	Summary of Aboriginal cultural heritage values	13-27
13.3	Construction impacts.....	13-32
13.4	Operation impacts	13-34
13.5	Decommissioning impacts.....	13-35
13.6	Environmental performance requirements	13-36
13.7	Residual impacts	13-37
13.7.1	Residual construction impacts	13-37
13.7.2	Residual operation impacts.....	13-38
13.7.3	Residual decommissioning impacts.....	13-39
13.8	Cumulative impacts	13-39
13.9	Conclusion.....	13-40

Chapter 14 Non-Indigenous cultural heritage

14.1	Method.....	14-2
14.1.1	Study area	14-3
14.1.2	Legislative context.....	14-3
14.1.3	Assumptions and limitations.....	14-5
14.2	Existing conditions.....	14-5
14.2.1	Local history	14-5
14.2.2	Non-Indigenous heritage records.....	14-6
14.2.3	Archaeological ground survey.....	14-6
14.2.4	Summary of non-Indigenous heritage cultural values.....	14-9
14.3	Construction impacts.....	14-9
14.4	Operation impacts	14-10
14.5	Decommissioning impacts.....	14-10
14.6	Environmental performance requirements	14-11
14.7	Residual impacts	14-12
14.8	Cumulative impacts	14-12
14.9	Conclusion.....	14-13

Chapter 15 Land use and planning

15.1	Method.....	15-1
15.1.1	Study area.....	15-2
15.1.2	Legislative context.....	15-4
15.1.3	Assumptions and limitations.....	15-4
15.2	Existing conditions.....	15-4
15.2.1	Land use policy context.....	15-5
15.2.2	Land use.....	15-9
15.2.3	Land tenure.....	15-13
15.2.4	Infrastructure.....	15-16
15.3	Planning policy.....	15-18
15.3.1	Planning approval approach.....	15-18
15.3.2	Consistency with planning policy.....	15-19
15.4	Construction impacts.....	15-20
15.4.1	Agriculture and rural industry.....	15-21
15.4.2	Forestry plantations.....	15-22
15.4.3	Brown coal resources.....	15-22
15.4.4	Township and rural residential.....	15-22
15.4.5	Tourism and recreation.....	15-23
15.4.6	Infrastructure.....	15-23
15.5	Operation impacts.....	15-24
15.5.1	Agriculture and rural industry.....	15-24
15.5.2	Forestry plantations.....	15-25
15.5.3	Brown coal resources.....	15-25
15.5.4	Township and rural residential.....	15-25
15.5.5	Tourism and recreation.....	15-25
15.5.6	Infrastructure.....	15-26
15.6	Decommissioning impacts.....	15-26
15.7	Environmental performance requirements.....	15-27
15.8	Residual impacts.....	15-28

15.9 Cumulative impacts	15-29
15.10 Conclusion.....	15-30

Chapter 16 Social

16.1 Method.....	16-2
16.1.1 Social wellbeing framework.....	16-3
16.1.2 Study area	16-4
16.1.3 Guidelines	16-6
16.1.4 Assumptions and limitations.....	16-6
16.2 Existing conditions.....	16-7
16.2.1 Outcomes of SIA consultation.....	16-7
16.2.2 Social baseline	16-8
16.3 Social value sensitivity	16-11
16.4 Social impact and opportunity assessment.....	16-14
16.4.1 Construction impacts.....	16-14
16.4.2 Operational impacts	16-20
16.5 Decommissioning impacts.....	16-23
16.6 Environmental performance requirements	16-24
16.7 Residual impacts	16-26
16.8 Cumulative impacts	16-40
16.9 Conclusion.....	16-42

Chapter 17 Summary of environmental effects in the Victorian terrestrial environment

17.1 Project activities.....	17-1
17.2 Method.....	17-2
17.3 Existing environment.....	17-2
17.4 Effects of construction	17-4
17.4.1 Environment and heritage.....	17-4
17.4.2 Amenity and land use.....	17-7
17.4.3 Social and economic	17-9

17.5 Effects of operation	17-9
17.6 Effects of decommissioning.....	17-12
17.7 Conclusion.....	17-13

Figures

Chapter 1 Introduction

Figure 4-01 Marinus Link project overview.....	1-2
Figure 4-02 Project overview – Victoria.....	1-3
Figure 4-03 Consultation phases.....	1-4
Figure 4-04 Structure of the Marinus Link EIS/EES	1-25

Chapter 2 Geomorphology and geology

Figure 4-05 Ecological vegetation classes in 1750 and 2005	2-5
Figure 4-06 Geology across the geomorphology study area	2-6
Figure 4-07 Watercourses intersecting the alignment.....	2-8
Figure 4-08 Physiography and faults.....	2-9
Figure 4-09 Seismicity	2-10
Figure 4-10 Geomorphology assessment trench sectors.....	2-13
Figure 4-11 Unmitigated and residual impacts on geomorphology.....	2-25

Chapter 3 Contaminated land and acid sulfate soils

Figure 4-12 Contaminated land assessment study area.....	3-3
Figure 4-13 Potential coastal acid sulfate soils	3-8
Figure 4-14 Potential acid sulfate soils associated with the Hazelwood power station	3-9

Chapter 4 Groundwater

Figure 4-15 Groundwater study area.....	4-3
Figure 4-16 Major surface water catchments within the project alignment	4-11
Figure 4-17 Hydrogeological setting within the study area.....	4-13
Figure 4-18 Existing groundwater basins and management areas.....	4-15
Figure 4-19 Groundwater level long section (Waratah Bay to Dumbalk).....	4-16

Figure 4-60 Prioritised management zones shore crossing – noise contour.	10-26
Figure 4-61 Prioritised management zones for local feature crossing works.....	10-28
Figure 4-62 Morwell River HDD indicative noise contours, dB LAeq	10-32
Figure 4-63 Hazelwood converter station site - typical operations (no standby generators) predicted noise contours day/evening dB LAeq (day/evening).....	10-35
Figure 4-64 Hazelwood converter station site - typical operations (no standby generators) predicted noise contours, dB LAeq (day/evening)	10-36

Chapter 11 Terrestrial ecology

Figure 4-65 Project areas and landscape regions.....	11-4
Figure 4-66 Terrestrial and aquatic groundwater dependent ecosystems	11-12

Figure 4-67 Threatened flora species records and locations	11-20
Figure 4-68 Threatened fauna species records and locations	11-26
Figure 4-69 Impacted areas of native vegetation and habitat by landscape region.....	11-75

Chapter 12 Bushfire

Figure 4-70 Bushfire study areas	12-4
Figure 4-71 Fire History - Hazelwood.....	12-6
Figure 4-72 Fire History - Waratah Bay.....	12-7
Figure 4-73 Site slope - Waratah Bay transition station study area	12-9
Figure 4-74 Site slope - Hazelwood converter station study area.....	12-10
Figure 4-75 Land use in and around the Waratah Bay transition site	12-12
Figure 4-76 Vegetation in and around the Waratah Bay transition site.....	12-13
Figure 4-77 Land use in and around the Hazelwood Converter station.....	12-14
Figure 4-78 Vegetation in and around the Hazelwood Converter station	12-15

Chapter 13 Aboriginal cultural heritage

Figure 4-79 Survey area and study area for the cultural heritage assessment.....	13-4
Figure 4-80 Likelihood of presence of Aboriginal cultural heritage values in the survey area based on the results of the digital predictive model	13-8
Figure 4-81 Victorian Aboriginal Heritage Register places within the study area	13-15
Figure 4-82 Surface Aboriginal artefact locations identified in IA-4 during the 2022 ground survey	13-19
Figure 4-83 Investigation areas with the highest number of artefacts uncovered during subsurface testing	13-21
Figure 4-84 Assessed Aboriginal cultural heritage values	13-31

Chapter 14 Non-Indigenous cultural heritage

Figure 4-85 Survey area and study area for the cultural heritage assessment.....	14-4
Figure 4-86 Aerial photograph showing the location of the brick cistern (1975).....	14-8

Chapter 15 Land use and planning

Figure 4-87 Study area overview.....	15-3
Figure 4-88 Study area segments	15-10
Figure 4-89 Location of Crown land in the study area.....	15-15

Figure 4-90 Infrastructure within study area.....	15-17
---	-------

Chapter 16 Social

Figure 4-91 SIA study area.....	16-5
---------------------------------	------

Tables

Chapter 1 Introduction

Table 1-1 Interests or concerns raised by the FPAG (October 2022 – May 2023).....	1-5
Table 1-2 Summary of communication and engagement activities.....	1-7
Table 1-3 Phase 3 promotion material	1-8
Table 1-4 Phase 3 communications material	1-8
Table 1-5 Environmental interests or concerns raised during Phase 3 engagement	1-17
Table 1-6 Social interests or concerns raised during Phase 3 engagement.....	1-20
Table 1-7 Cultural heritage interests or concerns raised during Phase 3 engagement.....	1-23

Chapter 2 Geomorphology and geology

Table 2 1 Geomorphic attributes	2-11
Table 2-2 EPRs	2-20
Table 2-3 Summary of unmitigated and residual impacts on trench sectors	2-23
Table 2-4 Trench sectors with high or major pre-mitigation impacts reduced to moderate or low residual impacts	2-30
Table 2-5 Trench sectors with pre-mitigation impacts of high or major reduced to high residual impacts ..	2-32

Chapter 3 Contaminated land and acid sulfate soils

Table 3-1 Legislation and guidelines relevant to the assessment.....	3-4
Table 3-2 Potential point sources of contamination	3-12
Table 3-3 EPRs	3-18
Table 3-4 Summary of residual impacts.....	3-21

Chapter 4 Groundwater

Table 4-1 Key legislation and guidelines relevant to assessment.....	4-4
--	-----

Table 4-2 Planning zones along the project alignment	4-6
Table 4-3 Summary of geological units along the project alignment.....	4-8
Table 4-4 Surface water catchments and waterway crossings	4-10
Table 4-5 Registered groundwater bores within 500 m of the project alignment.....	4-19
Table 4-6 Eight bores with registered extractive or unknown use within 500 m of the project alignment.....	4-20
Table 4-7 Rivers, creeks and waterbodies with moderate or high likelihood of being groundwater dependant within the project alignment.....	4-22
Table 4-8 Potential point sources of groundwater contamination	4-24
Table 4-9 Environmental values that apply to the Groundwater Segments in Victoria	4-24
Table 4-10 Sensitivity of groundwater aquifers	4-27
Table 4-11 Terrestrial GDEs with estimated groundwater drawdown.....	4-30
Table 4-12 Aquatic GDEs within estimated groundwater drawdown	4-32
Table 4-13 EPRs	4-42
Table 4-14 Summary of residual impacts	4-50

Chapter 5 Surface water

Table 5-1 Key legislation relevant to surface water assessment	5-5
Table 5-2 Waterway classification	5-7
Table 5-3 ERS water quality objectives.....	5-14
Table 5-4 Summary of available water quality data	5-14
Table 5-5 Shear stress threshold values	5-19
Table 5-6 Construction areas and their associated AoD within 1% AEP flood extent	5-22
Table 5-7 EPRs	5-36
Table 5-8 Residual surface water risks	5-41

Chapter 6 Agriculture and forestry

Table 6-1 Key legislation relevant to the assessment of agriculture and forestry.....	6-5
Table 6-2 Primary agriculture types across the study area	6-6
Table 6-3 Sensitivity of agriculture and forestry values.....	6-10
Table 6-4 Construction impacts – beef.....	6-12
Table 6-5 Construction impacts – dairy	6-12

Table 6-6 Construction impacts – horticulture	6-13
Table 6-7 Construction impacts – organic farming	6-14
Table 6-8 Construction impacts – horse breeding, training and spelling	6-14
Table 6-9 Construction impacts – forestry	6-16
Table 6-10 How land can be used within the easement.....	6-17
Table 6-11 EPRs	6-19
Table 6-12 Residual impact summary for construction impacts on agricultural values	6-24
Table 6-13 Residual impact summary for operation impacts on agricultural values.....	6-27
Table 6-14 Residual impact summary for impacts on forestry values.....	6-30
Table 6-15 Estimated area of forestry land impacted.....	6-31

Chapter 7 Landscape and visual

Table 7-1 Scale of effects	7-4
Table 7-2 Key policies and guidelines relevant to the assessment of landscape and visual.....	7-6
Table 7-3 Landscape character units and sensitivity rating	7-11
Table 7- 4 EPRs	7-24
Table 7-5 Residual impact summary	7-31

Chapter 8 Traffic and transport

Table 8-1 Key legislation relevant to the assessment of traffic and transport.....	8-5
Table 8-2 Average two-way traffic volumes in the study area derived by ATC surveys	8-8
Table 8-3 Theoretical capacity constraints of roads, in vehicles per day, based on their size	8-11
Table 8-4 Minimum road width dimensions of roads based on vehicles per day.....	8-11
Table 8-5 Values and corresponding attributes of the road network.....	8-21
Table 8-6 Intersection modelling results for the project construction phase	8-28
Table 8-7 Intersections requiring works to accommodate 19 m semi-trailer movements	8-30
Table 8-8 Intersections requiring works to accommodate transformer transporter vehicle movements	8-31
Table 8-9 Sight assessment results for intersections that do not meet the required sight distance guidelines but have the necessary signage	8-33
Table 8-10 Impact assessment for attribute 7 – Safe operation and management of construction activities.....	8-34
Table 8-11 EPRs	8-37

Table 8-12 Summary of moderate residual impacts, potential mitigation measures and EPRs	8-39
---	------

Chapter 9 Air quality

Table 9-1 Key legislation and guidelines relevant to air quality	9-3
Table 9-2 Magnitude of emissions by construction activity	9-13
Table 9-3 Proximity of receivers to project	9-13
Table 9-4 Sensitivity of the surrounding area to potential impacts during construction phases	9-14
Table 9-5 Preliminary risk for project.....	9-20
Table 9-6 EPRs	9-22
Table 9-7 Risk assessment summary	9-24

Chapter 10 Noise and vibration

Table 10-1 Key legislation and guidelines relevant to noise and vibration assessment	10-7
Table 10-2 Background noise monitoring locations	10-10
Table 10-3 Measured background noise levels, mean values dB LA90 per period.....	10-11
Table 10-4 Overall aggregated sound power levels of main construction activities	10-17
Table 10-5 Shore crossing - summary of predicted noise levels	10-24
Table 10-6 EPRs	10-38
Table 10-7 Risk assessment summary	10-43

Chapter 11 Terrestrial ecology

Table 11-1 Key legislation and guidelines relevant to terrestrial ecology	11-5
Table 11-2 Ecological vegetation classes that were likely to occur in the survey area pre-1750	11-8
Table 11-3 Potential terrestrial and aquatic GDEs on the project alignment	11-11
Table 11-4 Terrestrial ecology values and their level of sensitivity	11-35
Table 11-5 Total area of native vegetation and area potentially impacted by landscape region	11-38
Table 11-6 Habitat impacts for threatened Eucalyptus species	11-42
Table 11-7 Habitat impacts for owls, raptors and other large mobile fauna species	11-45
Table 11-8 Habitat impacts for aquatic fauna species	11-47
Table 11-9 Habitat impacts for waterbirds and waders	11-49
Table 11-10 Significant impact assessment of listed threatened shorebird species.....	11-67
Table 11-11 Significant impact assessment of migratory shorebirds.....	11-69

Table 11-12 Significant impact assessment of listed threatened woodland birds.....	11-73
Table 11-13 EPRs	11-117
Table 11-14 Summary of residual impact assessment	11-124

Chapter 12 Bushfire

Table 12-1 Key legislation and guidelines relevant to bushfire	12-3
Table 12-2 Assessed bushfire impact to life – Waratah Bay and Hazelwood sites	12-19
Table 12-3 Assessed bushfire impacts to property assets – Waratah Bay and Hazelwood sites	12-20
Table 12-4 Assessed bushfire impacts to life – underground cable.....	12-20
Table 12-5 Assessed bushfire impacts to property assets – underground cable	12-21
Table 12-6 Assessed bushfire impacts to life – Waratah Bay and Hazelwood sites	12-21
Table 12-7 Assessed bushfire impacts to property assets – Waratah Bay and Hazelwood sites	12-22
Table 12-8 EPRs	12-23
Table 12-9 Residual bushfire impacts	12-26

Chapter 13 Aboriginal cultural heritage

Table 13-1 Key legislation and guidelines relevant to Aboriginal cultural heritage	13-5
Table 13-2 VAHR registered Aboriginal cultural heritage places within the study area.....	13-13
Table 13-3 VAHR registered Aboriginal cultural heritage places within the assessment study area	13-14
Table 13-4 Previous studies of Aboriginal cultural heritage in the survey area	13-16
Table 13-5 Summary information on the investigation areas assessed during archaeological ground surveys	13-18
Table 13-6 Summary of results from the archaeological ground survey and subsurface testing program	13-25
Table 13-7 Summary of Aboriginal cultural heritage values.....	13-29
Table 13-8 Construction activities with potential to impact on Aboriginal cultural heritage values	13-32
Table 13-9 Construction impact assessment of Aboriginal cultural heritage values.....	13-33
Table 13-10 Operation impact assessment of Aboriginal cultural heritage values	13-35
Table 13-11 EPRs	13-36
Table 13-12 Summary of residual construction impact assessment on Aboriginal cultural heritage	13-38
Table 13-13 Summary of the residual impact assessment for operation and decommissioning on Aboriginal cultural heritage.....	13-38

Chapter 14 Non-Indigenous cultural heritage

Table 14-1 Key legislation and guidelines relevant to non-Indigenous cultural heritage	14-3
Table 14-2 EPRs	14-11
Table 14-3 Residual impact summary	14-12

Chapter 15 Land use and planning

Table 15-1 Key legislation relevant to the assessment of impacts to land use and planning	15-4
Table 15-2 EPRs	15-27

Chapter 16 Social

Table 16-1 Social wellbeing framework (after Smyth and Vanclay 2017).....	16-3
Table 16-2 Key guidelines informing the SIA	16-6
Table 16-3 Sensitivities of social values.....	16-12
Table 16-4 Construction impacts – community identity	16-15
Table 16-5 Construction impacts – economy and livelihood	16-17
Table 16-6 Construction impacts – infrastructure and services	16-19
Table 16-7 Construction impacts – people's productive capacities.....	16-20
Table 16-8 Operation impacts – community identity	16-21
Table 16-9 Operation impacts – economy and livelihood	16-22
Table 16-10 Operation impacts – people's productive capacities	16-23
Table 16-11 EPRs	16-24
Table 16-12 Residual impact summary for project construction	16-27
Table 16-13 Residual impact summary for project operation.....	16-36
Table 16-14 Cumulative impacts	16-41

Plates

Chapter 5 Surface water

Plate 5-1 Geomorphic condition observed at the Morwell River	5-17
Plate 5-2 Geomorphic condition observed at the Tarwin River East Branch	5-18
Plate 5-3 Geomorphic condition observed at Stony Creek	5-18

Plate 5-4 Geomorphic conditions observed at Buffalo Creek..... 5-18

Chapter 14 Non-Indigenous cultural heritage

Plate 4-05 Brick cistern, located in Buffalo (view north-east)..... 14-7

Plate 4-06 Brick cistern, located in Buffalo (view south-west)..... 14-7
