
VOLUME 3 – MARINE
ENVIRONMENT

TABLE OF CONTENTS

Volume 3 – Marine environment

Chapter 1 Introduction

1.1	Marine project overview	1-1
1.2	Stakeholder engagement	1-4
1.2.1	Engagement activities	1-4
1.2.2	Engagement outcomes and responses.....	1-5
1.3	Structure of the EIS/EES.....	1-6

Chapter 2 Marine ecology

2.1	Method	2-2
2.1.1	Study area	2-4
2.1.2	Legislative context.....	2-7
2.1.3	Assumptions and limitations	2-10
2.2	Existing physical environment	2-10
2.2.1	Currents and waves	2-11
2.2.2	Bathymetry.....	2-11
2.2.3	Seabed sediments and zones	2-13
2.2.4	Coastal processes.....	2-13
2.2.5	Water quality.....	2-13
2.2.6	Underwater noise	2-14
2.2.7	Magnetic fields	2-15
2.2.8	Electric fields.....	2-15
2.3	Existing biological environment	2-17
2.3.1	Benthic environment.....	2-17
2.3.2	Marine protected areas.....	2-21
2.3.3	Biologically important areas.....	2-21
2.3.4	Cetaceans.....	2-23
2.3.5	Pinnipeds	2-28

2.3.6	Sea turtles.....	2-29
2.3.7	Marine birds	2-31
2.3.8	Marine fishes.....	2-40
2.3.9	Marine invertebrates.....	2-42
2.3.10	Summary of PMST results.....	2-44
2.3.11	Pelagic environment.....	2-45
2.3.12	Invasive marine species	2-45
2.3.13	Summary of values	2-47
2.4	Construction impacts.....	2-47
2.4.1	Shore crossing	2-48
2.4.2	Pre-lay grapnel run and cable placement on seabed.....	2-49
2.4.3	Cable trenching and burial.....	2-50
2.4.4	Cable infrastructure and hard substrate crossings	2-54
2.4.5	Underwater noise	2-55
2.4.6	Artificial lighting	2-65
2.4.7	Invasive marine species	2-66
2.4.8	Marine fauna collision.....	2-67
2.5	Operation impacts.....	2-69
2.5.1	Magnetic fields	2-69
2.5.2	Electric fields.....	2-73
2.5.3	Thermal fields	2-74
2.5.4	Inspection and maintenance impacts.....	2-75
2.6	Environmental performance requirements	2-77
2.7	Residual impacts.....	2-81
2.7.1	Construction.....	2-81
2.7.2	Operation.....	2-82
2.8	Decommissioning.....	2-89
2.9	Cumulative impacts.....	2-90
2.9.1	Cumulative impacts during construction.....	2-91
2.9.2	Cumulative impacts during operation.....	2-92

2.10 Conclusion2-94

Chapter 3 Marine resource use

3.1 Method3-2

 3.1.1 Study area3-3

 3.1.2 Legislative context.....3-5

 3.1.3 Assumptions and limitations3-6

3.2 Existing conditions3-6

 3.2.1 Maritime traffic3-7

 3.2.2 Commercial fisheries.....3-9

 3.2.3 Recreational fishing.....3-10

 3.2.4 Recreational boating and other uses3-10

 3.2.5 Existing subsea infrastructure and offshore industries.....3-11

 3.2.6 Summary of values3-14

3.3 Construction impacts.....3-14

 3.3.1 Temporary exclusion zones and shore crossing3-14

 3.3.2 Maritime traffic3-15

 3.3.3 Commercial fisheries.....3-15

 3.3.4 Recreational fishing and boating.....3-16

 3.3.5 Marine tourism and recreation3-17

 3.3.6 Existing infrastructure.....3-18

3.4 Operation impacts.....3-18

 3.4.1 Navigation.....3-18

3.5 Decommissioning impacts.....3-19

3.6 Environmental performance requirements3-20

3.7 Residual impacts.....3-22

 3.7.1 Construction.....3-22

 3.7.2 Operation.....3-22

3.8 Cumulative impacts.....3-24

3.9 Conclusion.....3-24

Chapter 4 Underwater cultural heritage

4.1	Method	4-2
4.1.1	Study area	4-3
4.1.2	Key legislation	4-5
4.1.3	Submerged heritage predictive modelling	4-5
4.1.4	Underwater heritage impact assessment method.....	4-6
4.1.5	Assumptions and limitations	4-7
4.2	Maritime heritage existing environment	4-8
4.2.1	Historical activities and context.....	4-8
4.2.2	Shipwrecks	4-9
4.2.3	Dumping sites	4-13
4.2.4	Vessel discard.....	4-13
4.2.5	Unverified geophysical anomalies	4-13
4.3	Aboriginal heritage existing environment	4-18
4.3.1	Geological history and human occupation context	4-18
4.3.2	Submerged cultural landscapes.....	4-20
4.4	Summary of cultural heritage values and sensitivities	4-28
4.4.1	Cultural heritage significance.....	4-29
4.4.2	Cultural heritage sensitivity.....	4-30
4.5	Construction impacts.....	4-30
4.5.1	Pre-lay grapnel run.....	4-31
4.5.2	Cable trenching	4-35
4.5.3	Rock armour and concrete mattresses	4-36
4.5.4	Anchoring.....	4-38
4.5.5	Horizontal directional drilling.....	4-42
4.6	Operation impacts.....	4-43
4.7	Decommissioning impacts.....	4-46
4.8	Environmental performance requirements	4-46
4.9	Residual impacts.....	4-48
4.10	Cumulative impacts.....	4-50

4.11 Conclusion	4-51
-----------------------	------

Chapter 5 Summary of environmental effects in the marine environment

5.1 Project activities	5-1
5.2 Method	5-2
5.3 Existing environment	5-2
5.4 Effects of construction	5-4
5.5 Effects of operation	5-6
5.6 Effects of decommissioning	5-7
5.7 Conclusion	5-7

Figure 3-02 Marine survey areas	1-3
Figure 3-03 Consultation phases	1-4
Figure 3-04 Structure of the Marinus Link EIS/EES	1-7

Chapter 2 Marine ecology

Figure 3-05 Marine ecology study area	2-5
Figure 3-06 PMST search areas	2-6
Figure 3-07 Water depths along the project alignment in Bass Strait	2-11
Figure 3-08 Bathymetry in nearshore Victoria	2-12
Figure 3-09 Magnetic anomalies in Bass Strait	2-16
Figure 3-10 Benthic habitats in central Bass Strait	2-19
Figure 3-11 Benthic habitat images in nearshore Waratah Bay	2-20
Figure 3-12 Conservation areas near the project alignment	2-22
Figure 3-13 Schematic of Helix T-1200 jet trencher burying a cable bundle	2-51
Figure 3-14 Distance to auditory thresholds	2-59
Figure 3-15 PTS and TTS zones for cetacean and pinnipeds	2-60

Figure 3-16 Cross section of magnetic field around buried western subsea cable operating at 750 MW....2-70

Figure 3-17 Existing and future third-party infrastructure near the project area.....2-93

Chapter 3 Marine resource use

Figure 3-18 Marine resource use study area3-4

Figure 3-19 Annual cumulative marine traffic density in Bass Strait.3-8

Figure 3-20 Key locations of recreational fishing, boating and other uses3-12

Figure 3-21 Existing subsea infrastructure and offshore industries.....3-13

Chapter 4 Underwater cultural heritage

Figure 3-22 Offshore and Victorian nearshore sections of the study area for underwater cultural heritage4-4

Figure 3-23 Potential shipwreck and sea dump locations within the offshore section of the study area4-10

Figure 3-24 Potential shipwreck and sea dump locations within the Victorian nearshore section of the study area4-11

Figure 3-25 Potential shipwreck locations within the Tasmanian nearshore section of the study area4-12

Figure 3-26 Unverified geophysical anomalies in the offshore section of the study area.....4-15

Figure 3-27 Unverified geophysical anomalies in the Victorian nearshore section of the study area4-16

Figure 3-28 Unverified geophysical anomalies within the Tasmanian nearshore section of the study area 4-17

Figure 3-29 Shoreline of Bass Strait during different periods of sea level rise4-19

Figure 3-30 Locations of submerged cultural landforms in the offshore section of the study area4-22

Figure 3-31 Locations of submerged beach ridge formations.....4-23

Figure 3-32 Sub-bottom profile data identifying an estuarine channel (left panel) and a terrestrial analogue of the estuarine channel, Shallow Inlet, Wilson Promontory (right panel)4-24

Figure 3-33 Core sampling locations in relation to the project alignment4-25

Tables

Chapter 1 Introduction

Table 1-1 Interests and concerns raised by the maritime stakeholders	1-5
--	-----

Chapter 2 Marine ecology

Table 2-1 Legislation, policy and guidelines relevant to the marine ecology assessment.....	2-7
Table 2-2 Offshore seabed zones and dominant seabed types.....	2-13
Table 2-3 Average water quality for offshore Bass Strait and nearshore Victoria (2020 to 2021)	2-14
Table 2-4 Geomagnetic field component along the project alignment	2-15
Table 2-5 Offshore benthic community zones.....	2-17
Table 2-6 Waratah Bay benthic community zones.....	2-18
Table 2-7 Summary of conservation status, PMST search data and likelihood of occurrence.....	2-23
Table 2-8 Conservation status, PMST search data and likelihood of occurrence of pinnipeds	2-29
Table 2-9 Conservation status, PMST search data and likelihood of occurrence of sea turtles.....	2-30
Table 2-10 Conservation status, PMST search data and likelihood of occurrence of marine birds.....	2-32
Table 2-11 Marine bird breeding BIAs within 50 km of the project alignment.....	2-35
Table 2-12 Marine bird foraging BIAs in Bass Strait.....	2-36
Table 2-13 Conservation status, and likelihood of occurrence of shore and wetland birds.....	2-37
Table 2-14 Summary of conservation status and likelihood of occurrence of migratory marine fishes within the PMST search area	2-41
Table 2-15 Likelihood of occurrence of threatened marine invertebrates known to occur in Victorian waters.....	2-43
Table 2-16 Summary of EPBC Act (Cw/ith) PMST results	2-44
Table 2-17 IMS likelihood of occurrence and distance from project.....	2-46
Table 2-18 Noise threshold levels for marine fauna groups.....	2-57
Table 2-19 Calculated distances from noise source to adopted noise threshold levels for marine fauna groups	2-61
Table 2-20 Project HVDC cable heating assessment results	2-75
Table 2-21 EPRs	2-77
Table 2-22 Summary of residual construction and operation impacts on marine ecology values	2-83
Table 2-23 Reasonably foreseeable marine-based projects in Bass Strait	2-90

Chapter 3 Marine resource use

Table 3-1 Legislation and guidelines relevant to marine resources assessment.....	3-5
Table 3-2 Summary of target species in Commonwealth managed fisheries	3-9
Table 3-3 Summary of target species in Victorian managed fisheries	3-10
Table 3-4 Summary of marine activities and uses.....	3-14
Table 3-5 EPRs	3-21
Table 3-6 Summary of construction and operation impacts on marine resource use	3-23

Chapter 4 Underwater cultural heritage

Table 4-1 Key legislation relevant to the assessment of underwater cultural heritage.....	4-5
Table 4-2 Outline of geophysical anomalies in the offshore, Victorian nearshore and Tasmanian nearshore sections of the study area.....	4-14
Table 4-3 Predicted presence and condition of archaeological features in the identified submerged landforms	4-26
Table 4-4 Predicted heritage significance of maritime heritage site types in the study area	4-29
Table 4-5 Predicted heritage significance of potential Aboriginal cultural heritage artefacts in the study area.....	4-30
Table 4-6 Impact of a grapnel run and cable trenching on potential maritime heritage values in the offshore section of the study area.....	4-33
Table 4-7 Impact of a grapnel run and cable trenching on potential maritime heritage values in the Victorian nearshore sections of the study area.....	4-34
Table 4-8 Impact of a grapnel run and cable trenching on potential maritime heritage values in the Tasmanian nearshore sections of the study area.....	4-34
Table 4-9 Impact of a pre-lay grapnel run on the beach ridge strandplain and associated site type	4-35
Table 4-10 Impact of cable trenching on submerged landforms and associated site type.....	4-36
Table 4-11 Impact of rock armour and concrete mattresses on potential maritime heritage sites in the offshore section of the study area	4-37
Table 4-12 Impact of rock armour and concrete mattresses on potential maritime heritage sites in the Victorian nearshore section of the study area.....	4-37
Table 4-13 Impact of rock armour and concrete mattresses on potential maritime heritage sites in the Tasmanian nearshore section of the study area.....	4-38
Table 4-4 Impact of rock armour and concrete mattresses on potential Aboriginal cultural heritage artefacts in identified submerged landforms	4-38
Table 4-15 Impact of anchoring on potential maritime heritage values in the offshore section of the study area.....	4-40

Table 4-16 Impact of anchoring on potential maritime heritage values in the Victorian nearshore section of the study area.....	4-41
Table 4-17 Impact of anchoring on potential maritime heritage values in the Tasmanian nearshore section of the study area.....	4-41
Table 4-18 Impact assessment of HDD on potential maritime heritage sites in the Victorian nearshore section of the study area.....	4-42
Table 4-19 Impact assessment of HDD on potential maritime heritage sites in the Tasmanian nearshore section of the study area.....	4-42
Table 4-20 Impact of scouring from rock armour and concrete mattresses on the potential maritime heritage sites in the offshore section of the study area during operation	4-44
Table 4-21 Impact of scouring from rock armour and concrete mattresses on the potential maritime heritage sites in the Victorian nearshore section of the study area during operation.....	4-45
Table 4-22 Impact of scouring from rock armour and concrete mattresses on the potential maritime heritage sites in the Tasmanian nearshore section of the study area during operation.....	4-45
Table 4-23 Impact assessment of scouring from rock armour and concrete mattresses on potential Aboriginal cultural heritage artefacts in the identified submerged landforms.....	4-45
Table 4-24 EPRs	4-47
Table 4-25 Summary of residual impacts, potential mitigation measures and EPRs for maritime heritage	4-49
Table 4-26 Summary of residual impacts, potential mitigation measures and EPRs for Aboriginal cultural heritage artefacts	4-50
