Contents

Executive Summary		viii
1 Introduction		1-1
1.1	Proposal overview	1-1
1.2	The proponent	1-3
1.3	Project overview	1-4
1.4	Project timeline	1-5
1.5	Project objectives	1-5
1.6	Legislative framework	1-6
	1.6.1 Proposal	1-6
	1.6.2 Project	1-6
	1.6.3 Relationship to other development	1-9
2 Proposal description		2-1
2.1	Proposal key features	2-1
2.2	Proposal site	2-1
2.3	Construction	2-6
	2.3.1 Pre-construction phase	2-6
	2.3.2 Construction overview	2-11
	2.3.3 Plant and equipment	2-11
	2.3.4 Raw materials and energy	2-12
	2.3.5 Construction hours	2-12
	2.3.6 Construction workforce	2-13
	2.3.7 Transport and vehicle movements	2-13
	2.3.8 Testing and commissioning	2-13
	2.3.9 Reinstatement	2-13
2.4	Operation	2-14
2.5	Decommissioning	2-14
3 Rationale and project alternatives		3-1
3.1	Project rationale	3-1
	3.1.1 Supporting energy transformation	3-1
	3.1.2 Key objectives of the project	3-2
	3.1.3 Cross-governmental support for the project	3-2
3.2	Proposal specific rationale	3-3
3.3	Route and site selection process	3-3
	3.3.1 Connection to grid	3-3
	3.3.2 Existing values and constraints	3-4
	3.3.3 Assessment of potential sites	3-6
	3.3.4 Preferred site	3-10
	3.3.5 Project alternatives	3-11
4 Public consultation		4-1
4.1	Engagement approach	4-1
4.2	Engagement phases	4-1
	4.2.1 Phase 1 and Phase 2: Consultation before EIS preparation	4-2
	4.2.2 Phase 3: Consultation during EIS preparation	4-6
	4.2.3 Phase 4: Ongoing consultation	4-12
4.3	Stakeholders	4-12
	4.3.1 Tasmanian Aboriginal Community	4-13
	4.3.2 Stakeholder identification and engagement methods	4-13
5 Existing environment		5-1
5.1 Planning aspects		5-1
	5.1.1 Land tenure	5-1
	5.1.2 Tasmanian Planning Scheme	5-2
	5.1.3 Land use history	5-6
	5.1.4 Sensitive land uses	5-7
5.2 Environmental aspects		5-9
	5.2.1 Soils, geology and landform	5-12
	5.2.2 Climate	5-12
	5.2.3 Noise	5-14
	5.2.4 Flora and fauna	5-14
	5.2.5 Conservation values	5-17

	5.2.6	Aboriginal cultural heritage	5-17
	5.2.7	Landscape values and views	5-18
	5.2.8	Water	5-18
5.3		Socio-economic aspects	5-21
	5.3.1	Community demographics	5-21
	5.3.2	Economy	5-22
6		Potential impacts and their management	6-1
		Identifying and assessing impacts	6-1
		Methodology	6-1
		Management and mitigation measures	6-10
		Cumulative impact assessment	6-11
6.1		Terrestrial natural values	6.1-1
	6.1.1	Assessment guidelines	6.1-1
	6.1.2	Methodology	6.1-3
	6.1.3	Existing conditions	6.1-5
	6.1.4	Applicable legislation	6.1-12
	6.1.5	Potential impacts	6.1-15
	6.1.6	Management, mitigation and monitoring	6.1-19
	6.1.7	Residual impacts	6.1-20
6.2		Potentially contaminated material and acid sulfate soils	6.2-1
	6.2.1	Assessment guidelines	6.2-1
	6.2.2	Methodology	6.2-2
	6.2.3	Existing conditions	6.2-3
	6.2.4	Applicable legislation	6.2-11
	6.2.5	Potential impacts	6.2-12
	6.2.6	Management, mitigation and monitoring	6.2-15
	6.2.7	Residual impacts	6.2-17
6.3		Marine natural values	6.3-1
	6.3.1	Assessment guidelines	6.3-1
	6.3.2	Methodology	6.3-2
	6.3.3	Applicable legislation and guidelines	6.3-8
	6.3.4	Existing conditions	6.3-8
	6.3.5	Potential impacts	6.3-23
	6.3.6	Management, mitigation and monitoring	6.3-44
6.4		Marine water quality	6.4-1
	6.4.1	Assessment guidelines	6.4-2
	6.4.2	Methodology	6.4-2
	6.4.3	Existing conditions	6.4-2
	6.4.4	Applicable legislation	6.4-4
	6.4.5	Potential impacts	6.4-7
	6.4.6	Management, mitigation and monitoring	6.4-9
	6.4.7	Residual impacts	6.4-9
6.5		Water quality (surface and groundwater)	6.5-1
	6.5.1	Assessment guidelines	6.5-1
	6.5.2	Methodology	6.5-2
	6.5.3	Existing conditions	6.5-5
	6.5.4	Applicable legislation	6.5-12
	6.5.5	Potential impacts	6.5-14
	6.5.6	Management, mitigation and monitoring	6.5-19
	6.5.7	Residual impacts	6.5-20
6.6		Noise and vibration emissions	6.6-1
	6.6.1	Assessment guidelines	6.6-1
	6.6.2	Methodology	6.6-1
	6.6.3	Existing conditions	6.6-6
	6.6.4	Applicable legislation	6.6-7
	6.6.5	Potential impacts	6.6-9
	6.6.6	Management, mitigation and monitoring	6.6-19
	6.6.7	Residual impacts	6.6-21
6.7		Air quality	6.7-1
	6.7.1	Assessment guidelines	6.7-1
	6.7.2	Methodology	6.7-1
	6.7.3	Existing conditions	6.7-3
	6.7.4	Applicable legislation	6.7-5
	6.7.5	Potential impacts	6.7-6

	6.7.6	Management, mitigation and monitoring	6.7-8
	6.7.7	Residual impacts	6.7-9
6.8		Waste management	6.8-1
	6.8.1	Assessment guidelines	6.8-1
	6.8.2	Methodology	6.8-1
	6.8.3	Applicable legislation	6.8-2
	6.8.4	Waste generation	6.8-3
	6.8.5	Management, mitigation and monitoring	6.8-5
6.9		Dangerous goods and environmentally hazardous materials	6.9-1
	6.9.1	Assessment guidelines	6.9-1
	6.9.2	Methodology	6.9-1
	6.9.3	Applicable legislation	6.9-2
	6.9.4	Potential impacts	6.9-2
	6.9.5	Management, mitigation and monitoring	6.9-3
	6.9.6	Residual impacts	6.9-4
6.10		Marine and coastal	6.10-1
	6.10.1	Assessment guidelines	6.10-1
	6.10.2	Existing conditions	6.10-1
	6.10.3	Applicable legislation	6.10-8
	6.10.4	Potential impacts	6.10-9
	6.10.5	Management, mitigation and monitoring	6.10-13
	6.10.6	Residual impacts	6.10-13
6.11		Greenhouse gases and ozone depleting substances	6.11-1
	6.11.1	Assessment guidelines	6.11-1
	6.11.2	Methodology	6.11-1
	6.11.3	Applicable legislation	6.11-2
	6.11.4	Potential impacts	6.11-3
	6.11.5	Management, mitigation and monitoring	6.11-4
6.12		Socio-economic issues	6.12-1
	6.12.1	Assessment guidelines	6.12-1
	6.12.2	Methodology	6.12-1
	6.12.3	Existing conditions	6.12-2
	6.12.4	Potential impacts	6.12-9
	6.12.5	Management, mitigation and monitoring	6.12-20
6.13		Infrastructure and off-site ancillary facilities	6.13-1
	6.13.1	Assessment guidelines	6.13-1
	6.13.2	Methodology	6.13-1
	6.13.3	Existing conditions	6.13-2
	6.13.4	Applicable legislation	6.13-4
	6.13.5	Potential impacts	6.13-5
	6.13.6	Management, mitigation and monitoring	6.13-12
	6.13.7	Residual impacts	6.13-13
6.14		Cumulative and interactive impacts	6.14-1
	6.14.1	Assessment guidelines	6.14-1
	6.14.2	Approach to cumulative impact assessment	6.14-1
	6.14.3	Cumulative impacts with existing infrastructure	6.14-2
	6.14.4	Cumulative impacts with the proposed Heybridge Converter Station	6.14-2
		Cumulative impacts with North West Transmission Developments	6.14-4
	6.14.5	project	
	6.14.6	Cumulative impacts with reasonably foreseeable future development	6.14-7
7		Decommissioning and rehabilitation	7-1
	7.1	Assessment guidelines	7-1
	7.2	Construction	7-1
	7.3	Operation	7-2
	7.4	Management, mitigation and monitoring	7-2
8		Management, mitigation and monitoring	8-1
	8.1	Environmental management	8-1
	8.2	Mitigation measures	8-2
	8.3	Monitoring and review	8-22
9		Conclusion	9-1
	9.1	The project is environmentally acceptable	9-1
	9.2	Ecologically sustainable development (ESD)	9-2
	9.2.1	Integration principle	9-3
	9.2.2	Precautionary principle	9-4

9.2.3	Inter-generational equity	9-4
9.2.4	Conservation of biological diversity and ecological integrity	9-5
9.2.5	Improved valuation, pricing and incentive mechanisms	9-5
9.2.6	Public participation	9-5
9.2.7	The global dimension	9-6
9.2.8	Strong economy	9-6
9.2.9	International competitiveness	9-6
9.2.10	Environmental management	9-6
9.3	Objectives and requirements of the EMPC Act	9-6
9.4	Conclusion	9-9

Appendices

Appendix A. Environmental Impact Statement Guidelines: Shore Crossing for Marinus Link

Volume 2

Appendices

Appendix B. Terrestrial Ecology Impact Assessment
Appendix C. Contaminated Land and Acid Sulfate Soils Impact Assessment

Volume 3

Appendices

Appendix D. Marine Ecology and Resource Use Impact Assessment

Volume 4

Appendices

Appendix E. Marine Benthic Habitat Characterisation
Appendix F. Groundwater Impact Assessment
Appendix G. Surface Water Impact Assessment

- Appendix H.** Noise and Vibration Impact Assessment
- Appendix I.** Air Quality Impact Assessment
- Appendix J.** Greenhouse Gas Assessment
- Appendix K.** Social Impact Assessment
- Appendix L.** Economic Impact Assessment
- Appendix M.** Traffic and Transport Impact Assessment

Volume 5

Appendices

- Appendix N.** Ground Conditions Factual Report
- Appendix O.** Supporting Technical Memos
- Appendix P.** Climate Change Impact Assessment
